Lithotripsy Systems

## MULTIMED Classe

$n$ order to meet the rising needs of the lithotripsy world, ELMED, in an increasing manner, keeps their innovations, which enable users to make effective operations. As a result of such innovations, ELMED proudly introduces their Multimed Classic system including first ever dynamic patient recording and statistical reporting software which enables user to keep all necessary data of the patient during the course of the treatment. With this feature, there is no need to enter records of the patient on the separate environment. Multimed Classic provides cost effective and anesthesia-free, ambulatory treatment with excellent fragmentation.

ELMED is setting the standards.

## ELMED <br> Lithotripsy Systems

ith the recent developments in lithotripsy equipment, a new criteria is set for the new generation systems, which should benefit from not only dual imaging, but also accurate dual localization capability. Multimed Classic is equipped with a specially designed motorized Urological table with radiolucent top which enables to make all endourological operations under fluoroscopy.
Multimed Classic enables users to localize the stones by using either specially designed U-arm fluoroscopy unit Lithoscope or standard C -arm unit as well as the computerized automatic ultrasonic localization robot arm, namely Lithoarm.

The Hi-tech ultrasonic localization system with computerized articulated robotic arm provides automatically localization of all kinds of kidney stones including the low density and non opaque stones. Lithoarm provides automatical localization feature which can be found only on the expensive new generation systems, with an affordable price.

The proven effectivity of Multimed Classic is achieved by the best combination of high energy Electrohydraulic Generator, geometry of reflector and special materials of standard electrodes. The system is designed to operate by both standard electrodes and long-life electrodes at users' option.

The optional ultrasound probe attachment whose center axis passes through the focal point on every position provides to the user real-time imaging and manual localization by ultrasound

Compact

## Affordable

Upgradable

Cost effective

## Transportable

Anaesthesia free
Efficient and safe
Fully Computerized
Low installation cost
Low maintenance cost
Out patient treatment
Short treatment time
Treats the stones in the kidney,
entire ureter, bladder and elsewhere

## Main Specifications

| NMURTCNA |  |
| :---: | :---: |
| Energy Source | Electro-hydraulic system |
| Focusing | Ellipsoid |
| Patient Coupling | Membrane (Dry Coupling) |
| Localization | Fluoroscopy and/or Ulltrasound |
| Focal Distance | 135 mm . |
| Focal Dimension | $7.5 \times 22 \mathrm{~mm}$. ( $50 \%$ isobar dim.) |
| Focal Pressure | up to 1200 bar |
| Operating Voltage | variable 0 to 21 KVolt ( 24 KV for long-life system) |
| Frequency | variable 40 to 150 shocks/min. |

Triggering Modes Water System

|  | pressure regulation and 8.5 It . water capacity |
| :--- | :--- |
| Height | 1130 mm. |
| Length | 1170 mm. |
| Width | 460 mm. |
| Weight | 210 kg. |
|  |  |
|  | 850 to 1150 mm. |
| Height | $640 \times 1950 \mathrm{~mm}$. |
| Patient Surface Width | $750 \times 1250 \mathrm{~mm}$. |
| Table Support Width | 155 kg. |
| Weight | Electronically adjustment in 3-dimensions |
| Table Adjustment Limiting | 300 mm. |
| Vertical Movements | 100 mm . (150 mm. optional) |
| Longidudinal Movements | 100 mm . (150 mm. optional) |
| Lateral Movements | Lateral \& Trendelenburg |
| Tilting | 200 kg. |

| Manipulator Type | Revolute type Articulated arm |
| :--- | :--- |
| End effector | Ultrasound Probe holder |
| Kinematics parameters | 7 links, 6 joints and 5 angles |
| Angle Sensors | Precision resistive angle sensors |
| Software | 32 bit execution under Windows XP |
| Application | Adaptable to every kind of lithotripters |

| -प\|-10-c-P= |  |
| :---: | :---: |
| Fluoroscopy Voltage | 40-110 KVolts (Automatic Brightness Control) |
| Fluoroscopy Current | $0.2-3.5 \mathrm{~mA}(\mathrm{ABC})$ two main selection |
| Image Intensifier | $6^{\prime \prime}$ ( $7^{\prime \prime}, 9^{\prime \prime}, 12^{\prime \prime}$ optional) |
| X-Ray Tube | $0.6-1.5$ ( 1.8 mm . optional) mm. focal spot, fixed anode tube $40.000 \mathrm{H} . \mathrm{U}$. |
| TV Camera | High resolution CCD Camera |
| Monitor | 17 BW, 625 / 50 or 525 / 60 lines |
| Height | 1830 mm |
| Length | 1250 mm |
| Width | 510 mm |
| Weight | 225 kg |
| c-EN=-3A |  |
| Main Supply The system complies with | 230 or $115 \mathrm{VAC} \pm 10 \% 50-60 \mathrm{~Hz}$ Single Phase According to EN 60601-1 Class I, Type B According to 93/42/MDD, Class IIb |
